

I've started a new library at Mediamax called...

<http://www.mediamax.com/kubotabooks>

I've already uploaded a few parts catalogues I collected over the last 12 months. Anyone can view and instantly DOWNLOAD them by clicking the above link, then the green arrow. (You don't need passwords)

You can also UPLOAD any suitable material to this same library by going to...

<http://www.mediamax.com/>

Click the link that says 'Upload files to MediaMax Users'...

(It'll take you to this address..

<http://upload.mediamax.com/Upload/Up...rUsername=true>)

Next type " kubotabooks " into the username.

Use 'SINGLE FILE UPLOAD'. DO NOT CLICK THE 'MULTI-FILE UPLOAD'. THE 'SINGLE FILE UPLOAD' WILL ALLOW YOU TO ADD A NUMBER OF FILES.

Use the 'Browse' or 'Choose 'button to find the file on your computer. Once you have found your file, press 'Open'.

When you have finished compiling the list of files you wish to upload press 'Upload'

Unfortunately your uploaded files won't go directly to the public 'hosted' area of kubotabooks. Your files will initially go into a 'File Manager', so I'll have to log in once a day to move the files into the hosted area for all to see.

Regarding file names: Files appear in mediamax in alphabetical order. Please bear that in mind if you have changed the file name. Strict adherence to tractor model numbers is probably the best and simplest method to follow.

(Note. I've found that uploading and downloading from Mediamax does not work when using Explorer on an Apple. But Safari and Firefox are fine. Explorer is OK on a PC.)
