**Solenoid Operated Double Selector Valve**

**ITEM 9-5117 \$149.99**

• Brand new. Dual 12 volt DC solenoid operated double selector/multiplier valve. Allows one double acting control valve to operate your choice of two double acting cylinders or motors. Ideal for use with tractor remotes. When used with "variable flow" or "closed center" systems valve can be used as a selector, or power both solenoids and direct fluid to both circuits at the same time.

- SPECIFICATIONS**
- 3000 PSI
  - 15 GPM
  - 12 volt DC
  - Ports SAE 8
  - Size 4 1/2" x 2 1/2" x 6 1/2"
  - Shpg. 7 lbs.

**12 VDC Triple Selector Valve**

**ITEM 9-6865 \$149.95**

• New, triple selector valve originally built for use on CATERPILLAR skid-steer loaders. Part # 155-5569-GP04. Allows one directional control valve to control three separate circuits. First circuit is prioritized so first solenoid must be powered to turn first circuit off. Second or third solenoids must be powered to select their circuits after first circuit is turned off. Check valve in "A" port in the third circuit. Restrictor fitting (0.045" orifice) installed in the P1 inlet port can easily be removed, restricts flow to all three "A" ports. Wire leads with DEUTSCH DT04-2P weatherpac connectors. First selector has a built-in restriction to restrict flow to the actuator (e.g. for use with a grapple).

- SPECIFICATIONS**
- 1.50 amps per solenoid
  - Ports SAE 6
  - Size 5 1/2" x 1 3/4" x 5 1/4"
  - Shpg. 10 lbs.
  - 12 GPM max
  - 3000 PSI max
  - 12 VDC
