

Starlink during thunder storm 5/17/2025

direct to starlink,
down 13 Mbps, up 12 Mbps 50 ms latency

my laptop through my Starlink wifi;

after; also using the starlink wifi a considerable improvement;

This a speed test through my network
with this later test at the same time the star link router was showing,
down 280 Mbps, up 19 Mbps, latency 20 ms.
